Video aur AI toolkit

Un logon ke liye jo CapCut mein sirf trim, speed aur awaaz kar lete hain. Sab tools free hain ya un ka free plan kaafi hai. Har tool ke saath likha hai ke istemal karna hai, sirf try karna hai, ya chhorna hai. Free limits sites ke 2026 ke pages se li hain, aur badalti rehti hain: pehli baar use karne se pehle pricing page dekh lein.

90 din ke plan ke saath

- **Hafta 1:** Clipchamp kholein, ek 9:16 project banayein. 15 minute Klippy aur 15 minute ChatCut try karein. Jo aasan lage wahi rakhein. Overview video se YouTube "Edit into a Short" ke zariye 3 Shorts.
- **Hafta 2 se:** har Sunday 4 videos record, Monday Clipchamp mein edit + captions, Tuesday schedule.
- **Hafta 3:** photo wali 2–3 minute ki video. Lambi video Clipchamp mein, us se 2 Shorts YouTube ke tool se.
- **Hafta 11:** January ke 8 Shorts ek saath record (batching).

Beauty aur gym jaise topics: research ka nateeja

- **Gym / protein:** Arabic, Spanish aur French teeno mein protein calculator pehle se bohat hain (khaleejcalculators, fitnessvolt, gymkee, hacecuentas, omnicalculator, zavamed). Yahan koi gap nahi mila.
- **Skin tone / undertone:** zyada tar bade brands ke AI selfie tools (Maybelline, Estée Lauder, Ulta). Arabic mein koi tool nahi mila, magar volume ka data bhi nahi. "Gora karne" wale topics se door rahein: ye rang-bhed se jure hain aur products health ke daire mein aate hain.
- **Hair fall:** Norwood aur graft calculators maujood hain, aur ye health (YMYL) ke tahat hain.
- **YMYL ka asar:** Google sehat aur paise ke topics par expertise, author aur sources ko zyada wazan deta hai. Nayi site ke liye ye sab se mushkil maidan hai.
- **Nateeja:** abhi ye niches na lein. Hamari taqat dates, documents, paisa aur padhai ke tools hain, local zubanon mein. Wahan research data (Semrush) bhi hai, competition kam hai, aur hum rank bhi kar rahe hain.
